

Children live in one continuous story where every little moment is big. New games pop out of life's most common activities—from rolling, sitting, or standing to brushing their teeth and putting on their clothes.

Rabbit Skins lives in the anytime, anywhere adventure. Our palette is for each personality, big and small. Our comfortable fit makes moving like a puppy, a dinosaur, or a princess free and easy. Our care for each stitch means one less worry for mom and dad. We believe the brightest futures start in the safe and colorful now.

And that's exactly why you'll find Rabbit Skins Fit for Any Tale.

HOW ARE WE DIFFERENT?

Snap Tape

Plastic snap components are injection-molded onto soft polyester tape, providing a secure and consistent snap placement. This innovative technology, combined with design features like a soft-touch hidden closure, ensures that our Rabbit Skins bodysuits deliver both safety and a refined aesthetic.

WRAP Certified Factories

Worldwide Responsible Accredited Production.

CPSIA Compliant

All Rabbit Skins products undergo consumer product testing to meet stringent regulatory safety standards.

All garments feature a permanent tracking label in the side seam. CPSIA COC's by style and by style/purchase order (All are available on our website & actual tests are available upon request).

Fabric: Combed Ringspun Cotton

Rabbit Skins is proud to offer a combed ringspun cotton fabric on almost every style in our offering. By utilizing a higher end cotton, we are able to offer a product that is durable, breathable, soft, and easy to decorate. We also sew all White & Ash garments with 100% cotton thread for easy garment dying abilities.

Fabric: 3-End Fleece

All Rabbit Skins styles were transitioned to a 3-end fleece with 100% cotton face in 2024. This transition allows for a softer, more durable fabric that has a smoother surface. By offering a 100% cotton face, it allows for a cleaner decoration and better ink absorption for durability and ease of care.
